and goals met

Distributed mosquito nets to protect 75 households

Networked with local health promoters and nurses to collaborate and cooperate.

Raised awareness about the use of natural plants as mosquito repellents

Collected epidemiological data on the population of Nanga

Annual Report 2024

FIELD WORK

Achievements
and goals met

Visited IIMSAM in Kisumu and partnered to soon distribute spirulina in Nanga, aiming to combat anaemia and build a community free from malnutrition and malaria.

We helped approximately 1,500 people.

Supported Fredrick 's medical care and helped him recovered from tetanus and malaria infection.

Distributed educational material to health staff and teachers

Annual Report 2024

FIELD WORK

Achievements and goals met

Identified mosquito breeding sites

Followed up on prevention lessons learned in the workshops and follow-up with people who are taking medication e.g. pregnant women

We designed and commissioned the making of our T-shirts

Delivered education workshops to prevent malaria transmission, to health staff, educators, adults, and children

MISSION
MALARIA

Malaria-free Africa
